

DIDSBURY PIONEER

VOL. XXXII. No. 31.

DIDSBURY, ALBERTA, THURSDAY, AUGUST 1, 1935

\$2.00 per year. 5 cents a copy.

Constable Cameron Transferred to this Detachment.

Constable Cameron, R.C.M.P., has received word of his transfer to the Olds Detachment. Don expects to leave in the very near future. The Cameron family will be missed from this community, but best wishes for their continued success go out to them from their many friends of the town and district.

— Crossfield Chronicle.

Lymburn Will Speak

The U.F.A. will open their campaign here this Friday evening, when Hon. J. F. Lymburn, attorney general for the province, will address a meeting in the opera house at 8.30 p.m.

Mr. A. B. Claypool, the U.F.A. candidate for the Didsbury constituency will also address the meeting.

R. B. Bennett Gov't Swept Into Office 5 Years Ago Sunday

It was exactly five years Sunday since the last Dominion general election, the balloting taking place on Monday, July 28, 1930. Prime Minister R. B. Bennett was swept into office with a majority over all and was sworn in on August 7.

The present parliament is the third since Confederation that has exhausted its full five years of life. The parliament of 1891 was not dissolved until 1896, while Sir Robert Borden's administration of 1911 continued until 1917. Canada then being in the midst of war.

Dissolution of Parliament is expected to be announced shortly, with prospects of the general election late in September.

Didsbury Horses Win at Red Deer

W. J. Fulkerth who exhibited his horses at Red Deer Exhibition was the heaviest winner in the light horse classes. He won 2nd prize for stallion; 1st and 2nd for mares; 1st for 2 year old filly; 1st and 2nd for 1 year old filly or colt; 1st for 1935 foal and 2nd for brood mare with foal at foot.

He also won 2nd and 3rd in the saddle horse class.

Didsbury Enters Softball Playoffs

Didsbury Hill Billies have entered their team in the Alberta Softball Playoff and the first games will be played on August 5th, but the schedule has not yet been arranged.

Twenty-six teams have entered the series with 16 teams from Edmonton and 5 from Calgary. Other towns represented are Didsbury, Olds, Gleichen (2), Namaka, Wetaskiwin, Lethbridge, and Canmore.

Alberta Butter at the Top

As a result of victories at Calgary and Edmonton Exhibitions, Alberta creameries are once more in the lead in the percentage of prizes taken in the butter division of these fairs. Ten years ago Alberta butter was customarily in the lead, but only once since that time till this season did the province hold the position. Creameries from five provinces exhibited. At Edmonton a total of 65 prizes were taken by Alberta creameries, against 55 by those from Manitoba, which was Alberta's nearest competitor. Alberta's percentage of first prizes was 51.6, against Manitoba's 41.9.

In the May group the Alberta creameries which won first place were the Chipman creamery; Calmar creamery; Tofield creamery; New Sarepta creamery; Woodland Dairy, Edmonton; Innisfail creamery; Central creameries, Eckville; and the City Dairy, Lethbridge.

In the June group the Alberta first place winners were Crystal creamery, Didsbury; Burns and Co., Leduc; Tofield creamery; Fertile Valley creamery, Ponoka; Calmar creamery; Stettler creamery; Edberg creamery, and Burns and Co., Hay Lakes.

Wheat Pool Payments Total 77.71 Cents

Farmers marketing their wheat through the Alberta Wheat Pool will receive approximately 77.71 cents a bushel from the 1934-35 pool on the basis of No. 1 Northern.

The net return is made up of an initial payment of 50 cents, an interim payment of 15 cents and a final of approximately 12.3-4 cents. Cheques for the final payments were mailed over the week-end.

This price was based at Vancouver and the net price at country points was about 62½ cents.

Announced recently by pool officials, the final payment schedule shows that sales and operating expense deduction for the 1934-35 pool amounted to 1.004 cents a bushel from the gross price.

250 Candidates In Provincial Field Expected

Nominations This Week and Next Expected to Boost Total Considerably

Nominations this week and next probably will push the total number of candidates for the Alberta election scheduled for August 22nd close to the 250 mark.

There are now 235 in the field. The Aberhart social crediters have a candidate named for every one of the legislature's 63 seats, and the Liberals have nominated 61, having decided to enter only four candidates in the six-seat Calgary riding. The United Farmers have nominated 42 and expect to have more, while the Conservatives, with 42 now nominated, have more conventions scheduled. Minor factions have 25 names in the field so far, and are expected to add some in the next 10 days.

Doings Of Our Neighbors.

Note change of date of Olds Fair Aug. 13 and 14. See posters for full particulars.

At Carstairs — Lawrence H. Bussard of Olds has been engaged as principal of Carstairs school for the coming term at a salary of \$1,400. Mr. Bussard, who has his B.A. and M.A. degrees, has had several years teaching experience.

At Innisfail — As a fitting memorial to those men of Innisfail and district who made the supreme sacrifice during the Great War, the Innisfail branch of the Canadian Legion B.E.S.L. at a meeting held on Sunday unanimously decided to erect at Innisfail a suitable cenotaph.

It is proposed to establish a bird sanctuary on the Little Red Deer, adjacent to the bridge west of Innisfail. Mr. Pickering of the Ingleswood sanctuary, who inspected the property, stated that it was one of the finest sites for a game preserve that he had seen in the province. It will comprise four sections along the river just at the bridge. Already there are a number of pheasants in the district and with a preserve set up, they will increase rapidly.

Gun Club Shoot.

Fred Aastrup was the high man at the Gun Club shoot on Monday with a score of 21 out of 25 birds. The other scorers were: E. Watkin 20, O. Meek 17, Jim Caithness 17, G. Julien 16, K. McCoy 15, Chamberlain 14, Landon 13, Walkley 9.

The shoot for the Dominion Ammunition Trophy will be held on Wednesday, August 14th in the afternoon at 2 o'clock. The competition is open to any member of the club and anyone may become a member at a nominal fee of 50c. A practice shoot is being held every Monday prior to the competition.

Federal Vote Date Expected This Week

The expectation in political circles is that Prime Minister R. B. Bennett will, some time this week, dissipate the uncertainty surrounding the date of the general election.

The government leader will return to Ottawa in the next few days and one of his first acts will be to announce the dissolution of Parliament.

Stevens Will Campaign In Alberta Soon

Tentative plans for the Alberta speaking itinerary of Hon. H. H. Stevens, Reconstruction leader, were made at an organization meeting here today. Mr. Stevens, who attended the meeting and spoke briefly, said he would probably be able to spend from Aug. 10 to Aug. 13 inclusive in Alberta. While definite dates were not allotted, it was practically decided meetings would be held at Edmonton, Calgary, and probably Lethbridge, with possibly another meeting at some other place. He would be back in Winnipeg Aug. 15, Mr. Stevens said.

Economic Safety League Formed

For the purpose of exposing the inevitable disaster which many believe would follow the adoption of Aberhart Social Credit, a new Economic Safety League has been formed in the province. Members of all political factions who are opposed to the Aberhart scheme, are said to be in the group. Daily radio broadcasts in support of their beliefs are being sent out from Calgary and Edmonton stations.

Legion Memorial Service

The Didsbury Branch of the Canadian Legion have arranged to hold their annual memorial service at the Butte on Sunday, August 11th.

Rev. Mr. Cripps of Red Deer, provincial chaplain of the Canadian Legion, has been invited to conduct the service.

All returned men, whether members of the Legion or not, are asked to make arrangements to attend the memorial service in honor of their fallen comrades.

Car and Truck Collide

When returning from the show at Didsbury on Monday night the car driven by Lorne Butchart of Carstairs collided with an Airdrie truck at the corner of Boundary Street and the highway.

Miss Bertha Hoffman, of Carstairs, and Butchart sustained scratches and bruises and were treated at the Didsbury Hospital but were able to proceed home.

The car was badly wrecked and the truck was slightly damaged.

Liesemer Nominated for Calgary.

Alderman A. J. Liesemer was nominated as one of the three Labor candidates for the city of Calgary in the forthcoming provincial elections. The other candidates nominated were Ald. Fred White and Ald. W. G. Southern. All the candidates are members of the Calgary city council.

Knox United Church Notes.

Arrangements have been made between Revs. F. E. H. James and J. R. Geeson for the services at the churches in Olds and Didsbury for the month of August. For the first two Sundays Mr. Geeson will have charge, and for the last two, Mr. James. This will involve the change of time for Westcott from 11 a.m. to 3 p.m. for the first three Sundays, and on August 25th there will be no service. So far as Didsbury is concerned there is no change in the time of service, and the services will be held continuously through the month.

The sermon topic for next Sunday is, "Down Life's Long Trail." A cordial invitation is extended to all.

Tea at its Best "SALADA" TEA

Be Careful!

On Dominion Day in a riot at Regina, precipitated by relief camp strikers when police attempted the arrest of their leaders, one man was killed, in the neighborhood of one hundred persons more or less seriously injured, and damage done to property estimated at around \$25,000. The news of this happening filled the papers, newspaper's "extras" flooded the streets, reports were telegraphed all over the continent, and cables carried the news to Great Britain and foreign lands. For a time it was almost the sole topic of conversation, and called forth questionings and discussions in the House of Commons. The Federal Government promised a searching investigation.

The Ontario Government is publishing a series of advertisements in the newspapers of that province. One such advertisement appearing almost simultaneously with the Regina riot says: "In Ontario, during 1934, there were nearly 10,000 automobile accidents, 512 people were killed, 8,990 people were injured, a considerable increase over 1933." No estimate was given of the property damage resulting from these 10,000 accidents, but it must have reached a total well up into the hundreds of thousands of dollars, if not into the millions.

Here are two sets of figures—two pictures if you will. Just consider them for a moment.

In the one instance, one man was killed and approximately 100 persons injured, most of them only slightly. Yet the whole Dominion is shocked, parliament is aroused, the law has been ignored, flouted, a crime committed. Immediate government action is demanded by practically all the people.

In the other instance, over five hundred times as many people were killed, thousands were injured, many of whom were maimed and disabled for life, property damage was enormous. But only a passing mention in the local newspapers at the time of each accident, and possibly some casual local comment, but, generally speaking, the public displays little concern and accepts the situation with smug complacency.

Is it not time that the Canadian people shed their indifference in regard to these day by day highway tragedies, and bestir themselves to put an end to such wholesale killing? The Ontario Government says in its advertisement that "Ontario must start 'thinking' safety; that it must be evident to all thinking people that 'this must stop'."

But how is it to be stopped? It is quite correct to say that people must "think" safety; but they must put their thinking into actual practice and "act" safely. But, people will say, in the Regina incident the law was broken. But, so, too, was the law broken in the vast majority of these automobile accidents. Our provincial statute books, and our municipal by-laws, teem with laws and regulations governing the operation of automobiles. Constituted authority has done its part in endeavoring to provide for safety, and to the best of its ability it endeavors to enforce these laws and regulations, but it is an enormous task over hundreds of thousands of miles of roads and highways.

There is only one way to stop manslaughter on the highways, and that is for the individual motorists to stop it—stop it by strictly obeying the laws which have been enacted for their protection and for the protection of others. It is disregard of the law that is the root cause of the trouble.

Motorists must discipline themselves; not be disciplined by the law. It is pointed out, for example, that there were more than 800 bicycle riders killed or injured in Ontario last year. Bicyclists, especially children, are often careless. This simply means that drivers of motor vehicles must be "twice" as careful. They must remember that they are in the heavier vehicle. At stop streets and intersections they must "stop". Instead of taking so many things for granted, they must make sure that brakes, tires, lights, are effective; otherwise serious trouble may lie ahead.

Owing to economic conditions of recent years, many worn out and poorly equipped cars are being used. Drivers of these should be exceptionally careful. New makes of cars are more powerful, speedier, and the drivers of these are under a greater responsibility than ever before. They must remember that the old cars are not so speedy, and govern themselves accordingly when passing such cars. These are only a few "musts"; there are many others that might be mentioned.

Some motorists resent all these laws and regulations. They deliberately ignore "stop" signs, and take all manner of chances while knowing their action is contrary to law. But with the mounting toll of deaths and accidents there is bound to be more law, not less, greater restrictions instead of fewer of them. Public opinion will demand and insist on this. So if motorists desire to be free of so much law, they must refrain from being a law unto themselves; rather they must discipline themselves and not act as if they were above all law.

On the other hand, pedestrians and others than motorists using the highways must recognize that motorists have certain rights which ought to be respected. It is largely through the payment of license fees and gas taxes by motorists that our modern highways have been created and are maintained for the use of all. And accidents are by no means uncommon where the motorist is entirely blameless.

Canadians are reputed to be a law-abiding people. A riot is an exceptional occurrence in this country. Law must be respected and obeyed. But in view of the awful death and accident toll on our highways, there should be—must be—not merely observance of the letter of the law, but the whole spirit of it. In a word, the most important law of all for motorists, pedestrians, and others, is "Be Careful". Being careful, practising safety first, will result in the observance of all law.

Must Have General Knowledge

Recruits To Metropolitan Police Have Tricky Test

Somebody should revise that song, one line of which runs "If you want to know the time ask a policeman!" These days it does not go nearly far enough in London.

For instance—do you want to know the advantages of the hire purchase system to the buyer? Or to the seller? If you are at all curious about it—ask a policeman.

Or do you want to know why a steel ship floats? Ask a policeman.

If in an unduly enquiring mood you can ask the same constable why a fire burns more rapidly if a newspaper is placed in front of it, why a steam engine has a fly-wheel; why tinned goods remain in good condition for a considerable time; why lead is commonly used for water pipes in houses.

Or being of a more sporting than scientific frame of mind, ask the same constable to describe to you what is meant by a knock-out, evens on the field, a stymie, catching a crab or body-line bowling.

The new policeman will be able to answer you with ease on each or all of these posers, and a good many others beside.

The reason? Well, these were some of the questions given to recruits to the Metropolitan force, and they were only allowed an hour in which to answer them.

There were more, even more tricky, but the above is a good sample.

Astronomer Views Sun Spots

These Spectacles Resemble Large Whirlpools Of Flame

Whirlpools of flame, large enough to swallow up the earth, are marching across the face of the sun.

Clouds stayed away from the sun long enough recently to give H. S. McClung, Regina optometrist and amateur astronomer, and visitors a glimpse of the sun spots.

The spots at present consist of a group of three or four near one edge of the sun's face and a single large one near the opposite side of the 850,000-mile wide disk.

Sun spots, similar to cyclonic disturbances in the earth's atmosphere, are whirlpools or whirlwinds in the brilliant outer envelopes of the sun, exposing the darker inner portion.

About two years ago a period of sun spot activity was entered and the activity will last for about another nine years.

Some persons attribute disturbed weather conditions on the earth to the sun spots. They are believed to produce, also, spectacular displays of northern lights.

Study Water Resources

Engineers Now Engaged In Work Over Wide Area

Geological survey of the southern drought section of Saskatchewan is under way.

Recently, 50 senior students, drawn from the engineering department of the Saskatchewan University, started work.

Travelling in 16 up-to-date motor trucks, the survey parties will investigate water resources of approximately 100,000 square miles in southern Saskatchewan and south-eastern Alberta.

The survey party has been organized into 20 sub-parties, each comprising an engineering graduate and two senior students.

The work is being conducted under the direction of Dr. B. R. MacKay, Dominion geologist, and the area extends from the Manitoba boundary west to near Lethbridge, and from the international boundary north to near Saskatoon.

STOP THAT ITCH In One Minute

D. D. D. Prescription Speeds Relief

It is really surprising to see how Dr. D. D. D. Dennis' pure, cooling, liquid, antiseptic D. D. D. Prescription quickly stops itching tortures of eczema, pimples, mosquito or other insect bites, rashes and other skin afflictions. Forty years' world-wide success. Its gentle oils penetrate the skin, soothing and healing the inflamed tissues. No fuss—no mess. Clear, greaseless and stainless—dries up almost immediately. Try D. D. D. Prescription today. Stops the most intense itching instantly. A 35c trial bottle, at any drug store, is guaranteed to prove it—or money back. D. D. D. is made by the owners of ITALIAN BALM.

Human Slate

Skin Of Toronto Boy Registers Writing Like A Blackboard

Toronto has a human slate. He is John Darch, 17, whose skin responds to a stick in the same way a blackboard responds to chalk.

Take a stick and write on John, and what is written takes visible shape in the form of a welt that can be felt when a finger is passed over it. How long the writing remains depends on the pressure applied.

FASHION FANCIES

DOUBLE-DUTY DRESS WITH JACKET

By Ellen Worth

Another delightful little jacket dress—if you're needing something fresh and tubbly for warm days. So lovely to look at as well as so practical to wear.

A very pretty effect is the plain sky-blue shantung bodice against the navy dotted sky-blue shantung as pictured.

This jacket dress is equally attractive carried out in sheer cotton prints, pastel tub silks, linen, etc. Few models could be simpler than today's with its sleeveless dress and raglan sleeved jacket.

Style No. 938 is designed for sizes 14, 16, 18 years, 36, 38, and 40-inches bust. Size 16 required 4 yards of 39-inch material with 1 yard of 39-inch contrasting.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

Evidently Liked Cage

A trailer containing three lions broke loose from a circus truck in Dallas Texas, smashed into a ditch and jarred the cage door open. R. Thomas, the truck driver, went for help. Police arrived and found the three lions peacefully sitting in the cage—the door still wide open.

Seventy of every 100 men in Birmingham who were idle in 1931 have returned to work.

British Mystery Air Craft

Claimed To Be The World's Heaviest Armed Air Fighter

The new British mystery aeroplane "Fairey Fantome," claimed to be the heaviest armed air fighter in the world, will be brought from its closely-guarded hangar at Hendon soon to roar over the heads of experts in a display for the Society of British Air Craft constructors.

The ship carries four machine guns, one on each lower wing and two atop the fuselage, and also a quick firing gun which throws 20-millimeter shells.

The magazine of this gun carries 60 shells, fired through the propeller hub instead of through synchronized spaces of the whirling blades.

This new machine, expected to reach a speed of 250 miles per hour, has been secretly constructed at a British factory to compete in the international fighting plane competition to be held in Belgium in July.

Advertising Canada

Australian School Children To Write Essays On The Dominion

Australian school children will be encouraged to learn about Canada.

Hon. R. B. Hanson, minister of trade and commerce, explained money voted would be used to conduct an essay competition in Australia among secondary school pupils. A prize of a trip to Canada would be the reward of the pupil who wrote the best essay on Canada.

A similar competition had been conducted in Canada by Australia. Mr. Hanson said the winning pupil was now enjoying her trip to the southern dominion.

Makes Ideal Insulator

Unexpected virtues have been discovered in the lowly seaweed. When tightly packed it forms an ideal insulating material, keeping out cold, noise, water, or even fire. Scientific tests prove that a mat of seaweed half an inch thick is more effective than a brick wall twelve inches thick. The seaweed has besides only one-fourth the weight of ordinary insulating material.

Sylvania is about 100 miles south-east of Prince Albert.

Says Agriculture Will Continue In The West In Spite Of Any Drouth

Agriculture can be and will be carried on successfully on the open plains of western Canada notwithstanding drought conditions, said Hon. J. G. Taggart, minister of agriculture in Saskatchewan, in addressing a session of the convention of the Canadian Society of Technical Agriculture at Edmonton. His subject was "The Western Drought Situation."

Grain-growing will be the type of agriculture that will be chiefly followed, in Mr. Taggart's opinion, but other types of farming will be followed as supplementary sources of revenue.

There will be a tendency, he thought, to larger farms and also toward the creation of reserves to provide against times of adversity.

Mr. Taggart, in dealing with the problem of the dry belts, did not regard Alberta's experience with irrigation as sufficiently satisfactory to be followed in the other provinces.

Conservation of water for crop production by dry farming methods is the most important way of improving the stability and productivity of the drought areas, Mr. Taggart believed, and he added that with an average rainfall it should be possible to store from four to six inches of water in summer-fallow land. This he regarded as generally more than could be provided by any feasible irrigation scheme in his province.

Crop rotations will not solve the problem of soil drifting or any other important agricultural problem in the open plains, said Mr. Taggart, and cereal production and summer-fallow in cycles of two or three years will be found the best course.

Physical reserves in the form of seed and fodder should be built up, the speaker pointed out, in any dry country. Groups of farmers might combine, he suggested, to carry such reserves, even though co-operative or community enterprises may not yet be possible.

New methods of making land appraisals will be necessary in view of the present financial difficulties of prairie farmers and the debt adjustment legislation now in operation, it was stated in a paper by Prof. H. C. Grant, of the University of Manitoba. In Mr. Grant's absence, the paper was read by F. W. Reinohl.

"The farm mortgage, which was once regarded as a blessing, may now be a curse to both the mortgagee and the mortgagor," thought Prof. Grant. "In the future it may be a share of the social dividend, if anyone knows what that means; but whatever happens, there must be new appraisals of land values."

Instead of farm lands being valued only on a basis of their productive capacity, as emphasized largely under the Farmers' Creditors' Arrangement Act, there must be a consideration, said Prof. Grant, of such points as normal sale value, forced sale value, and speculation, condemnation, loan, and assessed values.

Speaking of conditions in his own province, Prof. Grant pointed out that of 54,000 farms in Manitoba, 19,000 have mortgages on them, totalling \$76,906,000 and averaging \$10.86 per acre. Only one-third of the mortgages are held by loan and insurance companies, it was stated.

After the address by Mr. Taggart, plans of the Dominion government for meeting the problem of the drought areas were outlined by Dr. E. S. Archibald, director of Dominion experimental farms. Efforts will be made by the federal authorities, said Dr. Archibald, to co-operate to the full with all the provincial agencies in the field, in order to grapple successfully with the problem of the southern prairie region of western Canada.

Dr. E. S. Hopkins, Dominion agricultural husbandman, told the convention that he is optimistic about dry-land farming, believing that it has a more promising future than general farming in eastern Canada.

Some 36,000,000 acres of land in the prairie provinces are affected by dry conditions, Dr. Archibald noted,

and to meet the situation thus created a rehabilitation programme has been drawn up under legislation passed this year at Ottawa. The programme is to run for five years, and the first year's vote is \$750,000, with an additional \$500,000 voted later for water development work.

Ration For Pigs

The Use And Value Of Pasture For Market Pigs Is Shown

In experiments conducted over a number of years at the Dominion Experimental Station, Lacombe, Alberta, pigs fed on a straight grain ration of barley and oats, and allowed access to a small field or paddock sown to a pasture crop, made from thirty to forty per cent. more rapid gains, and from twenty to thirty per cent. more economical gains than pigs fed in dry lot where no green feed was available, and where they were entirely dependent for their nourishment on the grain mixture supplied in a trough or self-feeder. The pasture crop not only supplies succulence, and to a considerable extent avoids the possibility of worm infestation and disease infection, but it also provides the hog with proteins, minerals and vitamins which are lacking when pigs are fed only barley and oats, and no milk or tankage is available.

Experimental results at Lacombe also indicate that pigs confined to sanitary feeding pens and fed inside under what might be called the Danish plan on a grain ration properly supplemented with feeds high in proteins, mineral substances and vitamins, make faster and more economical gains than pigs fed similar feeds under outside conditions in a pasture lot. In a test conducted during the summer of 1934, Yorkshire pigs fed inside on a grain ration supplemented with tankage, cod liver oil and salt, made seven per cent. more rapid gains and fifteen per cent. more economical gains than pigs fed outside with access to an annual pasture mixture of oats and rye on a ration the same except that cod liver oil was not included. The results of this test would indicate that where sanitary feeding pens are available and the proper balancing of rations can be undertaken, there is no serious need for pasture accommodation for growing and finishing pigs of good bacon type and breeding. However, for growing young pigs, gilts and boars, for breeding purposes, or for carrying breeding stock, boars and sows, pasture and exercise are very valuable.

Where Dickens Got Names

Register Of Holborn Church Furnished Many Of Them

The two names Oliver and Twist are entered close to each other in the files of the parish register of the church of St. Andrew, Holborn. James Twist, the son of a shoemaker, of Baldwin Gardens, Holborn is recorded as having been born in 1813. Oliver is the name of a woman who was entered in the same year. The discovery is further evidence of the way in which Charles Dickens took many of the peculiar names used in his novels from the register at St. Andrew's. Mr. A. Jones, the verger, in his normal work, has for many years been compiling a list of names found in Dickens from the files of the Parish register between the years 1735 and 1859. There are now on his list over 60 names of people who probably lived in Holborn during Dickens' stay there. Among other discoveries of the probable origins of names are Corney, Rigaud, Todd, Minns, Mobbs, Wicks, Taplye, Heep, Brass, Badger and Harmon.

Notice in a church: "Worshippers who intend to put buttons in the collection are requested to give their own and not pull them off the hassocks."

Fireflies have no particular value, but to devour snails and the larvae of insects. 2106

Vegetarian Fish

Cleared Shallow Ornamental Lake In China Of Weeds

The centre of the campus of Yenching University, American missionary-supported institution near Peiping, China, is a shallow ornamental lake. Some time ago it was noticed that this lake was rapidly becoming choked with weeds. Ornamental qualities were greatly reduced, and freshmen raised objections to being thrown into the weedy waters.

Faced with the problem, the business department purchased a large number of "grass fish." These fish, true to their name, are vegetarians, spurning worms, flies and small fry when they can browse off succulent sea-weed or nibble at grass hanging in the water.

Like other grazing animals, "grass fish" have prodigious appetites and multiply rapidly. Within a surprisingly short period the lake was cleared of weeds.

An Envious Record

Alberta Claims To Be Lower Than Other Western Provinces In Percentage Of Defaults

With a lower percentage of defaults in municipal debentures than various other provinces, Alberta has an enviable record in municipal finance, Hon. J. R. Love, provincial treasurer, stated in an address.

Alberta's percentage of defaults was only one-half of one per cent., compared with 19½ per cent. for Ontario, 13 per cent. in Manitoba, and 8½ per cent. in British Columbia and Saskatchewan.

Is Possible To Banish Tuberculosis From The Face Of The Earth

Books Play Important Part

Have Great Influence On Lives Of Those Who Read

Books may play two different parts in the lives of men. They may be a respite and an escape from life. They may build for us the walls of another and quite separate world in which we can take refuge from all that wounds and limits and frustrates us in this one. Or they may be the daily bread of our thought and action, an element necessary to the practical working of our lives here and now.

But which ever part they play, whether they are to us the quiet garden in which the spirit dwells apart, or the fuel which feeds the active, militant mind and arms it for its encounter with hard facts, they become—whether we know it or not—an integral part of the texture of our being.

St. Kilda's Jubilee Gift

It is stated that the King is to have a length of tweed woven from the wool of wild sheep as a jubilee gift from St. Kilda, the evacuated island off the West Coast of Scotland. The Earl of Dumfries, eldest son of the Marquis of Bute, who bought St. Kilda as a bird sanctuary some three or four years ago, is to make the presentation.

The SNAPSHOT GUILD

VACATION PICTURES

Land or sea offers unlimited opportunities for snapshotting.

With the arrival of really warm summer weather, beautiful trees and flowers, we begin to think in earnest about outdoor life and vacations. I suppose one could go on a vacation without a camera but that would be like trying to sail a boat without a rudder. To say the least it would seem that something important was missing.

When planning a vacation you should look forward to the snapshots you are going to get, for on your return to home and work, and in later years when your trips become fond memories, you can always turn to your snapshots and enjoy your vacations over and over again. Snapshots pay dividends on your vacation investments in continued pleasure long after your return.

There is one important thing to keep in mind in vacation snapshotting and that is the variety of light conditions you may encounter in your travels. Picture taking might well be classed in four groups, according to the exposure they need, and by adopting as a standard exposure for each group, one that is intermediate between the shortest and longest that will make a satisfactory exposure, there will be only four exposures to consider and these can be memorized.

These four groups are as follows: Number one:—Marine and beach scenes and extreme distant landscapes. Number two:—Ordinary landscapes showing the sky with the principal subject of your picture in

the foreground. Number three:—Nearby portraits in the open shade... by that I mean not under trees or the roof of a porch and last—shaded nearby scenes.

These four groups, or classes, just about cover the different types of pictures you will want to take on your vacation. With modern-day film and cameras, exposure problems have been greatly simplified but it is still necessary to use a little good judgment and not expect the impossible from your camera.

There are many types of cameras to meet every requirement of the photographer, whether he is an amateur or a professional, but no camera is capable of taking all types of pictures under all conditions. It is true that some cameras are more versatile than others. One may have an extremely fast lens which permits the taking of snapshots under adverse lighting conditions and if it also has a fast shutter you can take pictures of subjects moving at extreme speeds. Other cameras have lenses and shutters of various speeds to take pictures—and good ones—within certain limits and conditions.

Almost every dealer in cameras and photographic supplies has printed outdoor exposure tables giving details of exposures, etc., in the four classes mentioned above. Ask your dealer for one of these outdoor exposure guides and then go forth with your camera and take the kind of pictures you'll be proud to show your friends.

JOHN VAN GUILDER.

Medically speaking, it is possible to banish tuberculosis from the face of the earth, Dr. H. E. Kleinschmidt, director of health education, National Tuberculosis Association, New York, said in an interview.

"When we say 'abolish', we do so from the standpoint of control. Plague is not gone, but neither does it ravage the world as it once did, because it is controlled," he stated.

Destroying the old theory that T.B. germs are present in every one, merely awaiting a lowered resistance to take active effect, Dr. Kleinschmidt stated that fully 50 per cent. of the youth of colleges and high schools, particularly in urban municipalities, were infected with early stages of the disease.

"On the other hand," he pointed out, "we have isolated communities where virtually all the children are free of it."

This knowledge is what demands of medicine that with the help of the public it drop its defensive war and go out in search of the disease.

"To the present our fight with tuberculosis has been defensive, the isolation of definite cases of the disease, mainly in sanatoria. In the last twenty-five years the death rate has fallen to about one-third and it has dropped from the chief cause of death down to sixth place.

"These facts are leading many people to think that it is no longer a menace. They are dropping their guard," he said.

The only way to go out and fight the disease is to make an examination of all children with the tuberculin test and the X-ray. The test is very simple, harmless and cheap and merely determines whether or not the germs are present, he said. The X-ray is relied upon to disclose whether any harm has been done.

"By this means we hope to anticipate the disease and not wait for it to develop. It is not a matter of expense so much as it is one of organization and public willingness.

"There is no telling where the germs are," he continued in paying tribute to the X-ray, which had almost replaced the stethoscope and "symptoms," in the diagnosis of tuberculosis. "We used to think that undernourished children were the most susceptible to it. You are just as likely to find it in the healthy, well-nourished child.

"Tuberculosis is a germ infection. Not a single germ, but a definite massive infection. They refer to it as a family disease. It runs through families, not that it is hereditary, but solely as an infection.

"A mother, unconscious of having tuberculosis, kisses her infant child on the mouth; that child has the disease," Dr. Kleinschmidt stated, and placed overwork, lowered resistance, and such generally attributed causes as being merely contributory elements once the germs had entered the body.

Speaking briefly of treatment, he emphasized the practice of lung collapsing as "the brightest ray that ever entered the life of a consumptive."

A relatively new method that has been in use upward of ten years, although it was known before that, it merely entails collapsing the lung or an affected part to allow the lung an opportunity to rest. A more radical treatment is to remove sections of the ribs so that the chest caves in and the lung is collapsed. This is a permanent collapsing, and Dr. Kleinschmidt emphasized one fact: "It is not a cure-all. There are cases to which it is not applicable."

Firemen Forgot Hose

Because firemen of Ratisbon, Central Bavaria, forgot the hose when they dashed to a recent fire, the owner of the burned building threatened to sue the municipal authorities for damages. The alert fire fighters answered the alarm promptly and took the latest type of fire engine, but the lack of hose left them nothing to do but stand and watch the building burn down.

Alberta Crop Report.

Generally speaking, the crop situation in Alberta may still be described as fairly satisfactory, says the fortnightly crop report of the department of agriculture.

Most of the spring wheat in the province is now headed out, and in the eastern and southern sections is ripening very fast. Cutting of fall wheat and rye is proceeding.

Since the department's last report of the drouth, which was seriously affecting certain sections of the southern and eastern parts of the province, has been relieved by rains of varying degrees which have brought promise of a gratifying recovery for grains on well-prepared land.

These crops have been standing up fairly well under the dry spell, and the rains have greatly improved the prospects.

The damage by drouth on crops on stubble lands, however, has been heavy, and as a result the general yield will be considerably reduced. The areas affected have been those from Cardston and Pincher Creek east to Lethbridge, north and northeast to Vulcan and Bassano and east to Empress, and northward along the eastern part of the province as far as Vermillion, Lloydminster and St. Paul.

Through the central portions of the province the crops are progressing generally under satisfactory conditions. This applies to the districts along the Macleod-Calgary line and the Calgary-Edmonton line and eastward to Hanna, Castor, Sedgewick and Innisfree.

In the northwestern districts and the Peace River, warm dry weather has brought considerable recovery from the effects of the very late season and heavy rains, and conditions are more promising, though still sufficiently late in a few districts to cause anxiety.

Damage by hail has been extensive in a few districts. Those chiefly affected have been the Lethbridge district, the Cayley-Lethbridge-Aldersyde district where 15,000 acres were reported damaged from 35 to 100 per cent, the Calgary-Strathmore-Gleichen territory, with similar losses over a strip 50 miles or more in length, and Westaskin district with damage reported from 70 to 100 per cent over a strip 30 miles long and 6 to 7 miles wide. Damage to somewhat smaller degree was done in the Olds, Red Deer and Sedgewick districts.

THIS IS TELLING THEM!

For the benefit of T. Fitzgerald it should be pointed out that it is customary (whether you are a citizen or not) to pay due respect to the National Anthem of the country in which you reside, even if only a temporary resident. To do otherwise shows ignorance and a want of good breeding.

— Crossfield Chronicle.

Cereal Crop Field Day at Lacombe, Aug. 14

The annual Cereal Crops Field Day will be held at the Dominion Experimental Station, Lacombe, on Wednesday, August 14.

This is always one of the largest and most important field days of the summer, and this year there are several new varieties and many marked differences of yield, earliness, strength of straw and general suitability, which distinguish varieties as adapted or not adapted to Alberta conditions of soil and climate.

The one thousand plots of the Dominion Crop Testing plan will make a most interesting subject for comparison and discussion.

This year there is a total of 6,427 plots under test at the experimental station. Many of the grain growing experts of Canada will be at the station to take part in the discussions and answer questions. Addresses will be given by Mr. Newman, the Dominion Cerealist, and other prominent seed growing specialists. Forage crops are rapidly increasing in importance but grain is still the main cash crop of Central Alberta. Come to the Cereal Crops Field Day on August 14th, and learn many valuable lessons concerning better varieties, improved methods, and the fine art of grain growing.

The experimental station will provide coffee, cups, cream and sugar. Visitors will please bring their lunches. The program will commence at 1 p.m. or immediately after lunch.

Red Deer U.F.A. Federal Constituency Annual and Nominating Convention

This convention will be held in the Parish Hall, Red Deer, at 2 p.m. on FRIDAY, AUGUST 9, to select a candidate for the forthcoming Federal election. Mr. Speakman will report on the last session of Parliament. The evening session will be held at 8 p.m. to be addressed by the candidate. The public are cordially invited to both meetings.

H. L. Taggart, Olds, President.

John Farrar, Penhold, Secretary.

Items of Interest

High winds of a velocity of 34 miles an hour did considerable damage in Medicine Hat over the week-end. Huge branches were ripped from trees in all sections of the city. Several fences and sign boards were flattened to the ground and oldtimers mournfully remarked that "such a gale would be harder on crops than a week's blistering sun."

Destroying the cream of Cremona's wheat crop during the week-end, the second hailstorm in the last ten days lifted over the village from the northwest, swung south of town to bombard the crops directly east with barrage of fine hail which left the fields tangled in an apparently hopeless condition.

Mrs. Theresa C. Clarke, well-known old-time resident of Coumts, Alberta, celebrated her 79th birthday Friday with one tooth breaking through of her "third set" that she is now believed to be getting, a rare development.

Over the past two years, business in the Dominion of Canada has recovered more substantially than in any other major nation.

Not only has the upward course of business been rapid, but it has been virtually free from the erratic fluctuations noted in the U.S. and from the retarding effects of drastic regulation.—Christian Science Monitor.

Choice medium weight hogs sold at Chicago last week for a new high price of \$11 per hundred, the highest in five years.

Ten thousand bushels of grain valued at \$7,000 and a 40,000-bushel elevator were destroyed in Edmonton late Monday when fire swept the plant of the Edmonton Grain and Hay Company. Total damage was estimated at \$50,000. Several firemen escaped narrowly when sections of iron flooring came crashing down as they stood at the bottom of the shaft.

Estimates for Europe's grain crop indicate an abundant increase over 1934 harvests, a report of the international institute of Agriculture said Monday. The wheat crop now is estimated at 440,000,000 quintals (about 1,628,000,000 bushels.)

Automobile Taxes Bring Big Income

Thirteen years ago, Alberta collected \$695,181 from registration fees on motor vehicles. Last year, the amount had increased to \$1,488,144, but the peak of collections was reached in 1930, when \$1,889,790 was collected from this source alone.

In addition to registration fees, gasoline taxation came into effect in the same year (1922), with a tax of two cents per gallon, when \$185,118 was collected. The tax was raised to five cents per gallon in 1929 when collections swelled to \$2,148,413. A further increase occurred in 1933 and the province obtained six cents per gallon while the present rate, introduced in April of this year, is seven cents per gallon.

Last year, with a tax of six cents per gallon \$2,656,669 was poured into the provincial treasury by motorists on their purchases of gasoline and, in the space of thirteen years, \$17,302,069 has been collected from this form of taxation. Aggregate collections for registration fees (\$16,726,523) and gas tax (\$17,302,069) have amounted to \$34,028,592 since 1922.

Said a note left in place of a dress on the clothesline of a downtown Winnipeg housewife Tuesday: "I had to take your dress. I am going to the beach, and I have nothing to wear." The next day the dress was back, a note attached: "Your dress doesn't fit. Thanks for the loan."

Ballot Boxes to Be Flown Into North

Airplanes will wing their way northward from Edmonton with two cargoes of ballot boxes for the forthcoming provincial elections, it was announced by John D. Hunt, chief electoral officer, Wednesday, as he completed plans for distribution of the boxes throughout the province. Two trips will be made by air to Fort Fitzgerald, and others by water will be necessary before deliveries of the containers are completed.

A motorboat load of the boxes will be taken from Peace River to Vermilion Chutes and it is likely that airplanes will be utilized for deliveries to Grouard and Wabiskaw. Wagons, trucks and trains are being used to take others to all voting points throughout Alberta.

Note change of date of Olds Fair Aug. 13 and 14. See posters for full particulars.

TENDERS WANTED

Sealed tenders will be received by and must be in hands of undersigned by noon August 8th, 1935, for:

The painting of Springside School, Barn and Toilets.

- ALBERTA SAVINGS CERTIFICATES -

A Sound Form of Investment

By Issuance of Savings Certificates, the Province of Alberta has for many years afforded opportunity to the public for investment of their savings at attractive interest rates, at the same time assisting the Province in maintaining public services vital to the welfare of the people.

In addition to the usual "Demand" Certificates, available in denominations of \$5 and upwards, the Government in 1932 inaugurated Term Certificates, bearing a fixed rate of interest for stated periods of one, two or three years. Purchasers of these certificates are afforded the same security as on Provincial Bonds. The term certificates are available in various denominations from \$25 up and are not subject to the varying market prices for debentures.

4 1/2% per annum will be paid on certificates redeemable in two and three years.

3 1/2% per annum will be paid on certificates redeemable in one year.

3% per annum will be paid on certificates redeemable on demand.

WORLD HAPPENINGS BRIEFLY TOLD

The tri-centenary of the death of Champlain was observed in Paris with exercises emphasizing Franco-Canadian friendship.

Princess Mary, daughter of the King and Queen, has left the hospital where she underwent an operation June 4.

A decree by Adolf Hitler whereby the ministry of war is given permission to enlist foreigners in the German army has been announced.

The Daily Mail said experts are working on behalf of Imperial Airways, with the support of the government to complete a detailed plan for north trans-Atlantic service.

The London Daily Express says Germany now possesses a fleet of war tanks, despite the fact they are specifically forbidden under the Treaty of Versailles.

Want to buy an island? Fanning Islands, Ltd., has two for sale—the Fanning and Washington islands located 1,000 miles south of Honolulu—but they must remain British and purchasers must be British subjects.

The French government, facing a budget deficit of from seven to eight billion francs (approximately \$462,000,000 to \$528,000,000) for the current fiscal year prepared to make drastic administrative economies.

U.S.S.R. press charged Japan's "deliberate provocations" along the Siberian border and Germany's preparations to attack European Russia placed the Soviet in grave peril of war.

It was learned that Hon. W. J. Roche, chairman of the civil service commission, has tendered his resignation to the government and it has been accepted. He will, it is understood, receive a gratuity of \$7,500, one year's salary, on retirement.

Soldiers On Guard

American Government To Bury Many Millions In Gold

United States government gold valued at many million dollars will be buried in the middle of Fort Knox, Ky., where 1,300 soldiers are on duty.

Treasury draftsmen, it was disclosed, have been ordered to rush construction of a huge underground vault at the army post as part of the government's policy of removing monetary stocks from vulnerable coast cities.

Much gold now stored in New York and Philadelphia will be transferred to Fort Knox. Not long ago nearly \$3,000,000,000 were sent from San Francisco to Denver, Rocky Mountains and the Appalachians thus will guard the precious bullion from any possible enemy invasion or mobs.

The government's gold stocks total more than \$9,000,000,000.

Making Tour Of World

Dr. E. Cora Hind Will Write Special Articles During Trip

Dr. E. Cora Hind, distinguished newspaper woman, who was recently honored by the University of Manitoba, sailed from Montreal on the Duchess of York for an 18 months tour of the world. Miss Hind, whose ability as a judge of standing crops and of livestock has made her a noted figure in the Canadian West and earned for her an unique place in journalism will visit the agricultural countries of Europe as well as the new lands where fresh furrows are being broken, writing en route special articles for the Winnipeg Free Press, with which journal she has been for many years.

Actor Stops The Show

A comic singer wearing a hat of the Mussolini type caused a theatre to be closed by the police in the port of Braila, Roumania. His act contained an ironical song at the expense of Signor Mussolini, which was a considerable success—until the Italian consul heard of it. The following day the police closed the doors of the theatre.

When exposed to red or infra-red light, certain types of diamonds generate electricity.

Dies In Poverty

Hero Was Rewarded With Medals, But Could Not Get Work

They pinned medals on Salvatore Bracco, Italian-born American seaman, a few years ago for his heroism in two rescues on the high seas.

When the S.S. President Harding saved the crew of the stricken freighter Ignazio Florio in 1925, Bracco was the first into the lifeboat which took 38 men from the freighter just as it sank. He got medals from five cities and a scroll from Benito Mussolini for that.

Greater recognition came in 1929 when the S.S. America rescued the crew of the ship Florida off the Virginia Capes. First to volunteer for the lifeboat crew, Bracco directed the rescue work. Former Mayor James J. Walker gave him a medal for his heroism when his ship reached New York. Later he received the congressional medal of honor, two more medals from Italy and six from American cities.

Seaman Bracco died in New Jersey recently in poverty. Ill with heart trouble, Bracco had been supporting his wife and son on a weekly relief grant of \$7.50. "Those who pinned medals on me and shook my hand wouldn't give me a job," he complained bitterly to his son a week before he died.

Cavell Grave Neglected

Resting Place Of Martyred War Nurse Is Uncared For

Complaints that the grave of Edith Cavell, the martyred World War nurse, is neglected have aroused indignation in England. Visitors to Norwich declare that evidently no care is given it. Nurse Cavell was born at Swardston, a village four miles from Norwich, and lies buried in Life's Green, close to Norwich Cathedral. Some time ago the public was aroused to protest against the scant attention paid to her last resting place, which many people from all parts come on pilgrimage to see. The responsible authorities, apparently the Dean and Chapter, took the matter in hand, but to-day fresh criticism is made of the condition of the grave. One observer declared that it is covered with rough gravel and seemingly had been a playground of dogs. On it lay the remains of a wreath of artificial poppies and a few bedraggled daffodils.

Recipes For This Week

(By Betty Barclay)

SOUR CHERRY JELLY

3½ cups (1½ lbs.) juice
7 cups (3 lbs.) sugar
1 bottle fruit pectin

To prepare juice, stem and crush about three pounds fully ripe cherries. Do not pit. Add ½ cup water, bring to a boil, cover, and simmer 10 minutes. (For stronger cherry flavor, add ¼ teaspoon almond extract before pouring.) Place fruit in jelly cloth or bag and squeeze out juice. Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire, and at once add bottled fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard ½ minute. Remove from fire, skim, pour quickly. Paraffin at once. Makes about 10 glasses (6 fluid ounces each).

STRAWBERRY FROSTING

2½ cups confectioners' sugar
¼ cup sweetened condensed milk
¼ cup fresh strawberry pulp
1 tablespoon lemon juice.

Stir sifted confectioners' sugar into sweetened condensed milk. Force enough strawberries through coarse sieve to make ¼ cup pulp; add with lemon juice to first mixture. Beat until smooth and creamy. Spread on cold cake. Makes enough frosting to cover top and sides of loaf cake, top of 2 (9-inch) layers or about 1½ dozen cake cakes.

War Memorial Fellowship

Cecil Edwin Hall, Edmonton, was the winner of the First War Memorial Fellowship, \$500, it was announced at Toronto recently by the Alumni Federation of the University of Toronto. Hall is an honor graduate in physics of the University of Alberta.

The Custer Massacre

Sioux Warriors Now Say Gen. Custer's Death Was Inadvertent

The killing of General George A. Custer—massacred with all his men 59 years ago—was "inadvertent," Barron Brown, an artist, said he had been told by participating Sioux warriors.

Because of an earlier friendship, Sitting Bull had ordered the General's life be spared, Brown was told by Little Soldier and other survivors of the band which defeated Custer at the battle of Little Big Horn.

"He was the last of the command to be killed," Brown was informed. "His death was inadvertent."

Brown said he had broken down the stony silence of the red man while painting portraits of the Standing Rock Reservation in North Dakota. There reside more than 20 participants in the famous battle.

They told him:

Had another American fighter, Reno, not struck at the retreating Indians, Custer would not have been attacked.

Rain-In-The-Face did not cut the heart out of Tom Custer, the General's brother, as some reports have stated.

The Sioux warriors did not mutilate their victims. That was done later by the old women and the youngsters.

Custer was not scalped. He had his long curly locks sheared off before the battle.

The reason the Indians stripped the whites of clothing was because they believed it would be needed during the retreat into Canada. have been gained by Canadian with army rifles sold to them by dishonest government agents.

National Crisis

Monaco Is Suffering From The Effects Of Depression

Monaco, where fortunes are lost and won on the turn of wheel, is seething with unrest in a national crisis born of the depression. The country's budget is unbalanced, hotels and shops are nearly empty and unemployment is widespread among the 22,000 inhabitants, whose principal work is serving tourists. Gambling receipts for the year ending March 31 were estimated at 70,000,000 francs, a drop of 24,000,000 from the 1931 figure.

"A party platform is a mighty important consideration," said one statesman.

"Yes," replied the other, "a party platform in politics is a good deal like a bunker in golf. The rules require it, but you show your skill in avoiding it."

National Youth Administration

United States Offering American Youths A Chance In The World

President Roosevelt has established a "national youth administration" to meet what he called a "great national need" by offering unemployed youth of the United States "their chance in school, their turn as apprentices and their opportunity for jobs."

The new agency will be under the work relief program. The president set aside \$50,000,000 to be used in providing work, apprenticeships in private industry, in offering high school and college training for those between 16 and 25, and in giving relief to youths.

The new undertaking was put under the direction of Miss Josephine Roche, assistant secretary of the treasury, and Aubrey Williams, assistant to Harry L. Hopkins, works progress administrator.

Mr. Roosevelt, in announcing the plan to aid an estimated 500,000 of young men and girls, said:

"I have determined we shall do something for the nation's unemployed youth because we can ill afford to lose the skill and energy of these young men and women."

An average payment of \$15 a month for youths on work relief was fixed; \$6 a month would be given to those going to high school and \$15 a month to youths in college.

Leprosy Cure

Report French Scientists Have Obtained A Positive Culture

Two French scientists have obtained a positive culture of the leprosy bacillus for the first time in medical history, it was announced before the French Academy of Medicine.

Dr. Albert Vaudremer, distinguished bacteriologist, aided by a young woman assistant, Mlle. Brun, presented the results of seven years' research to the academy. Their experiment resulted, for the first time since 1871, when the Norwegian scientist Armauer Hansen isolated the leprosy bacillus, in a positive culture of the deadly organism.

Dr. Vaudremer said the bacillus as cultivated in his experiments was agglutinated by serum taken from leprosy sufferers and that this serum destroyed within 24 hours the leprosy bacillus.

Pessimistic commentator says farming has been tough ever since the auto replaced the horse. It still looks back to its hay day.

Within a 50-mile radius of Spokane, Wash., are more than 90 fresh water lakes.

PATTERN 5374

Top your dress with handmade neckwear and you'll be right in step with Fashion's latest. With knitting needles clicking wherever one goes, you will be right in the swim if you knit your neckwear. If crocheting is your choice, the lovely lacy jabot will fill your bill. The round collar in perle cotton is knitted in a simple lacy stitch—points solid, the open part in a fagoting effect. The vestee with turn down collar is straight ahead knitting in a simple pattern that is repeated throughout. And the whole thing is made of two straight strips, so what could be easier? The crocheted jabot is in one straight piece joined at the center. It is lacy and has the flare that makes a jabot graceful.

In pattern 5374 you will find complete instructions for making the two knitted collars and the crocheted jabot shown; an illustration of them and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Little Journeys In Science

ATOMS

(By Gordon H. Guest, M.A.)

Many years ago John Dalton, an English schoolmaster, gave to science a very important theory concerning the structure of matter. This theory, which is known as the atomic theory of matter, assumes that every chemical element, such as oxygen, iron, or gold, is made up of small indivisible particles called atoms; that the atoms of different chemical elements have different weights, but those of a particular element are alike and constant in weight; and that chemical compounds, such as common salt and water, are formed by the chemical union of the atoms of different elements. Thus, an atom of sodium combines with an atom of chlorine to form the smallest particle, known as the molecule, of table salt, while two atoms of hydrogen combine with one atom of oxygen to form a molecule of water.

Recent studies of the properties of matter force scientists to assume the existence of particles still more minute than atoms; so Dalton's idea of the atom has been changed somewhat. The modern scientist believes that the atom is composed of tiny particles of negative and positive electricity, respectively known as electrons and protons. Although a proton weighs as much as 1845 electrons, its positive charge is exactly equal to the electron's negative charge. Each pulls as much as the other.

There are 92 elements and hence there are 92 kinds of atoms. Hydrogen atoms, consisting of only one proton and one electron, are the lightest. Uranium atoms are the heaviest, having 238 protons, and 238 electrons. In all atoms, the electrons are alike and interchangeable, like standardized bricks used in all sorts of buildings. It is believed that the electrons are revolving around the protons, which are located in the centre or nucleus, very much as the earth and the other planets revolve around the sun.

Under normal conditions the diameter of a hydrogen atom is estimated to be about a hundred millionth of a centimetre (2.54 centimetres equal 1 inch), which appears to be about twice the usual distance of its electron from its nucleus. The size of an electron is not known with accuracy but it is a very small fraction of the size of the whole atom. The nucleus, or central sun, appears to be still smaller. Thus an atom is largely a vacuum. It has been calculated that if the nucleus of a helium atom were represented by a pea, its two planetary electrons could be represented by two peas a quarter of a mile away. The electron of the hydrogen atom travels around its tiny orbit very rapidly, going, under normal conditions, about fourteen hundred miles per second. This means that it has to revolve seven billion times in one millionth of a second. These facts show that electrons and atoms are far too small for our comprehension; they belong to the world of the almost infinitely little. It is a marvelous fact that these tiny particles of matter, like the heavenly bodies, are never at rest.

The information concerning the structure of atoms has been obtained by the wonderful instrument known as the spectroscope, by X-rays, and from a study of such elements as radium, which are continually breaking down into other elements.

Secret Of Magic Sword

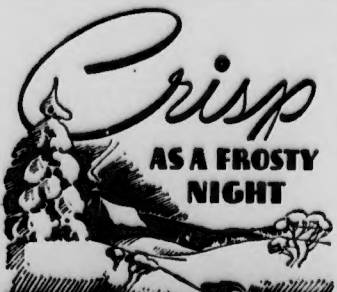

Weapon Of Serbian Heroes Was Made Of Nickel Steel

The old Serbian "heroes" of the Dark Ages, according to legend, were armed with "magic swords" which cut through their enemies' armor. Now a mining prospector, examining ancient workings in old Serbia, believes he has discovered the secret of those "magic" weapons. They were made, not of iron, but of nickel steel. In an old working he came on a piece of metal which is probably the oldest piece of special steel in existence. In vain he tried to bore a hole in it. Finally he sent it to Vienna to be examined. Here again difficulty was experienced in piercing it and analysis showed that it was nickel steel of peculiar hardness. The circumstances under which this piece of steel was found suggest that it is at least 1,000 years old—that is, it was in existence 950 years before nickel steel was rediscovered.

Boys are not as good sleepers as girls, according to tests made by an Atlanta physician. His conclusion comes after 150,000 hours of watching children sleep, by means of special electrical instruments.

All men are born free and equal, but most of them get married.

"One Wide River To Cross"
"The Unknown Port", Etc.

CHAPTER VII.—Continued

"It's gorgeous, isn't it?" breathed Nancy, truly impressed. "I—I'm sure I'm going to love this room."

Cousin Columbine smiled.

"It's our best, and I'm glad to see that you appreciate it. Jack will be next to you with only a door between. I sleep downstairs; and as I stated in my letter, Aurora goes home at night. Victor Tubbs is an invalid, or thinks he is, which amounts to the same thing, and his wife has supported him for years; a state of affairs that satisfies them both, though it makes me furious. However, it's none of my business; and if Aurora wants to work her fingers to the bone for such a lazy specimen, why worry, as Mark Adam would say? Now I'll leave you in peace. No doubt you'll prefer to unpack alone though Aurora was itching to see your wardrobe, and if she had, not so much as a safety pin would have escaped her eyes, and the account would have been spread from one end of Pine Ridge to the other before she slept tonight."

The old lady moved toward the door, then stopped to add: "If you need a lamp, the matches are in that tin box on the wall. Supper's at six sharp, so Aurora can get home to feed her precious Victor. There's water in the pitcher; but you may wash in the bathroom if you prefer."

She was gone at last, leaving Nance rather breathless with instructions. Jack had departed to his own quarters, and the girl stood quite still, looking about curiously. She had meant the view, of course, when she told Cousin Columbine that she loved the room. Now, sitting down suddenly on a straight, ungainly "bedroom chair," she wondered how it was possible to get so many ugly things into one place.

The bed! Towering black walnut, ornately carved. It was cold com-

fort to remember that her grandfather had had one almost as hideous at Edgemere. A bureau to match; even a washstand, behind which hung a square of linen to protect the wall paper. Hadn't she heard somewhere that they were called "splashers" in the dark ages when people used such things?

Nancy arose to regard this curious antique on which, embroidered in red cotton, was an infant splashing happily in a wash bowl, with the words, "Our Darling," below it. Horrors! Must she live with that monstrous baby for months and months? Must she wash in that bowl—even brush her teeth into it?

The girl could have wept for her own tiled dressing room; then remembered that it was hers no longer anyway. She turned slowly to observe a marble-topped table between the windows—a patent rocking chair upholstered in flowered carpet—a shelf above the air-tight stove on which stood two blue vases and what appeared to be a mound of mineral specimens mysteriously glued together, with a clock in the centre, a silent timepiece now, probably useless save as an "ornament."

Nancy's eyes lifted to the wall paper, a nondescript, faded tan, which, she decided, "might be worse." But the pictures (only two, thank goodness!) were simply terrible: an oil painting of a deformed looking kitten playing with a ball of yarn, and a steel engraving of General Grant. Could anything be more depressing.

As if to get away from all these objects, Nance moved to a window, half sick at thought of the long weeks ahead. Night was descending, and even the Peak, rising now against a gloomy sky, looked austere and forbidding. All the excitement of their arrival—the elation she had felt during the wonderful ride in Mark Adam's flivver—her interest in this new part of her own country—even the girl's sense of humor, were lost in an attack of overwhelming homesickness.

Aunt Louise had been right, she told herself. They shouldn't have come so far away. This terrible room! What would the girls at home think if they could see that washstand? And the pin-cushion. Why it was bigger than a boudoir pillow! And what in the world was she going to do with herself when the duties that Cousin Columbine imposed were finished? There would be nothing—absolutely no way to kill time. This thought, to pleasure-loving Nancy Nelson was appalling—not to be endured. Her unhappy eyes, resting on Pike's Peak, saw only a closet filled with dancing frocks, and a white fur wrap that she had never worn. She had to wink to keep the tears out of her eyes as she vowed audibly:

"I'll write to-night and tell Dad everything. Didn't he say that homesickness might as well be fatal? He'll understand. He'll send for me if he has to borrow money for the ticket. Jack will call me a slacker, but who cares? I just can't stand it here. I'd almost rather die than stay. What can there possibly be to interest a girl like me in a dreadful, ramshackle, down-at-the-heels settlement like Pine Ridge, Colorado?"

Later Nancy was to realize that as she stood there, oblivious to everything save self-pity, she hadn't known what sort of girl she was.

CHAPTER VIII.

"There's nothing," observed Jack from the door of his north-east bedroom, "like good, thick, sirloin steak to bolster up a morale that's slipping. Remember that, Sis."

It was eleven at night, and Nancy, attired in a wadded dressing gown of crimson silk, turned from the bureau to ask coldly: "May I inquire whose morale you have in mind?"

Her brother smiled as he investigated the patent rocking chair.

"I'm no moron, Nance. I knew when I found you staring out of the window in the dusk, that you were planning your escape. That's why I opened the door into that frigid hall. The aroma of broiling steak was in the air and I felt sure it would revive that fainting spirit—stiffen the backbone—stir your pioneer blood."

"Hush up," warned Nancy. "Our voices will disturb Cousin Columbine, and she admitted sitting up to

WAS CONSTIPATED FOR 30 YEARS

Woman's Long Search for a Remedy

The trouble with most remedies for constipation, as this woman found, is that they give only temporary relief. Having at last found a permanent corrective, she writes to tell us about it:—

"For upwards of 30 years I was a victim of acute constipation. I tried practically everything that it was possible to try. I admit I was a chronic case, and every new remedy I tried helped for a day or two—after that I was just as bad as ever. Three months ago I took my first taste of Kruschen Salts, and every morning since, and every morning so long as I live, my first duty upon rising is my Kruschen. I honestly feel a different woman. My bowels act to the clock, and my friends remark how well I am looking. My only regret is that I didn't try Kruschen years ago."—(Mrs.) A. M.

Kruschen Salts is Nature's recipe for maintaining a condition of internal cleanliness. The six salts in Kruschen stimulate your internal organs to smooth, regular action. Your system is thus kept clear of those impurities which, allowed to accumulate, lower the whole tone of the system.

an unheard of hour. Say!" the girl came nearer, whispering: "Did you ever see anything more—more soul destroying than this room?"

Jack grinned, gesturing with a thumb toward his own quarters.

"You should see mine! Not even a view, my dear; and it lacks this handsome walnut furniture." The boy's eyes shone with merriment; and though she wouldn't have believed such a proceeding possible a few hours earlier, Nance laughed a little. She didn't realize that after a leave of absence her sense of humor was returning, but she knew that something made her feel better.

"It was a wonderful supper, wasn't it?" she murmured.

"Trust you to appreciate it! And what swell china! I wish Aunt Lou could see it."

"It came from Denver in 18—well, eighteen—something—or—other, anyway. There's a complete dinner set. Imagine choosing that awful green-brown pattern! And Cousin Columbine's so proud of it, too. How on earth does she remember the date that everything was purchased?"

Jack shook his head, remarking in muffled tones: "She's a wonder, isn't she? Who else would have thought of cooking up that letter as a—what did she call it? Character test? You've got an awful lot to live up to, Sis, if you ask me. Hop into bed. I'll open the windows. And don't forget that breakfast's at seven sharp."

Sleep did not come quickly to Nance that night. She lay there under a patchwork quilt (whose weight, she wrote Aunt Judy later, was "almost crushing"), and thought about the evening that had just passed. There must be some truth in Jack's statement regarding the sirloin steak. What else could account for her more cheerful frame of mind? For Nance had been ravenous despite that slice of chocolate cake—the ugly, green-brown china, and a lamp in the centre of the table that was homely enough to ruin almost anybody's appetite.

There was no doubt that Aurora could cook a steak; and with unexpected tact, Jack had done most of

the talking, leaving his sister free to get herself in hand after what she now called her "brain storm." And when Aurora had gone, Jack carried that awful lamp into the sitting room and Cousin Columbine remarked casually, though her eyes twinkled: "I suppose you're thinking me an outrageous humbug. Sit down, my dears, while I confess."

This confession with its illuminating detours into the past, had kept Columbine Nelson talking until long after her customary bedtime.

"I'm going clear back to the beginning," she explained, "so you'll understand, if possible, just why I posed as a tottering old relic, too frail to stay alone at night. The truth is, there's nothing to be afraid of here, and if there were I wouldn't turn a hair. To one who can remember the Indian troubles of 1868, and as a child has hidden for hours in fear of hostile savages, well—you can readily see why an ordinary prowler would be tame in comparison!"

She looked up, smiling; while Jack, eyes popping out of his head, exclaimed: "You really lived through things like that?"

"Why not?" asked the old lady calmly. "This was nothing but wilderness when I was born. As you've heard tell, my first home was a covered wagon which, naturally, I don't remember. I do remember a house with a dirt floor and a stone fireplace in one corner, however; and dimly recall the furniture made from poles and rough-hewn lumber. It was home, and nothing to be ashamed of because no one else nearby had anything better."

"But wasn't it frightfully cold?" said Nancy. "A dirt floor, I mean?"

"I suppose it must have been—at this altitude; but Mother took care that I shouldn't suffer, of course. I can remember being tucked up on the bed with quilts all 'round me, watching the snow swirl against a tiny window, and loving it—I was so warm and cosy! It was my mother who suffered. Men can stand hardships better than women; and even in those days Father seemed always to be—well, my dears, to express it as you would, he seemed to be having the time of his young life."

"Did that cabin stand where this house does now?" Jack questioned.

"Very nearly. It was a bleak spot then. Except for the big pine beside the barn, Father planted every tree himself after he built the mansion."

"But why, when there was plenty of land to choose from, didn't you build back in the woods where it was sheltered?"

"Fear of two things," responded Cousin Columbine. "Fire, and Indians. If the savages were to attack us, we at least had a chance to see them approaching if we were in the open. And a forest fire's a terrible thing in the wilderness, Jack. I recall when I was a tiny girl,

"What's wrong with this Mustard, Mary? It's very poor stuff!"
Why John—

I thought I was getting a bargain—a big bag for 10¢

"It's no bargain at any price! I'll bet you would get more actual mustard in 10¢ worth of Keen's than you would out of any 10¢ substitute. The extra bulk is only flour, ground up hulls and colouring matter!"

"You're right! From this time on I'm going to stick to Keen's."

KEEN'S D.S.F. MUSTARD

Made from seed grown especially in the Fens of England. The shells or hulls are removed, all the virtue being in the inner part of the seed. A superfine grinding makes the full flavour readily available. In original tins for as little as 10¢.

Colman-Keen (Canada) Limited
1000 Amherst Street Montreal, Que.

watching one at night with my courageous little mother. We were all alone, Father having gone to California Gulch in search of gold. Looking back on those times, I don't see how she endured his absences, even though there were other cabins not far away. That fire was a terrifying sight, my dears. It must have been miles off, but looked almost near enough to touch. The growth was very thick and tall just there, and the flames seemed to leap from tree to tree, and as they reached the top, shoot up into the air, far up, higher than you'd believe possible, before subsiding. I have never forgotten it."

Nancy shivered; and Cousin Columbine continued: "So you see why we built in this bare place."

"And did your father find the gold?" Jack questioned.

"Not then. Not ever to any great amount. It was Leadville silver which built this mansion; but poor Mother never saw it. She died in 1874, when I was fifteen. A wonderful woman, my dears. She had the true pioneer spirit, but not the body to stand up under the pioneer hardships. She was only thirty-five when she left us to join my little brother who died in infancy."

According to Monday's Calgary Herald, Mrs. G. O. Feeg was the winner of third prize in the Blue Ribbon baking contest at the Exhibition.

Herman Dageforde had the misfortune to break his leg while playing baseball at Westcott Monday evening. After being rushed to town in Jay Tuggle's car, he was attended by Dr. Clarke.

Mr. Everard Clarke of Vernon was visiting his parents, Mr. and Mrs. N. S. Clarke, over the weekend. He left for Edmonton on Monday accompanied by his father and mother.

Mr. and Mrs. W. J. McCoy left on Saturday for Penticton, B.C., where they will visit Mr. and Mrs. W. J. Hillyard. Miss Jessie, who has been visiting there for some weeks, will return with them.

An interesting meeting of the Canadian Legion was held on Saturday evening when Rev. J. Clapperton, of London England, a brother of Mrs. Stanley F. Brown, gave an interesting talk on the Legion work in England and activities during the Jubilee celebration.

You can save money by buying your footwear and work gloves from T. E. Scott.

The Mountain View Social Credit group will hold a meeting at Riche Oldham's place at 8.30 Monday, August 5th. Mr. Hammil of Carstairs will explain the transferable ballot.

For the best value in men's footwear, go to T. E. Scott.

Word has been received of the death of Mr. Fred Boettger of Mayton, father of Mr. Ed. Boettger, who died at his home on Wednesday, July 31st. Mr. Boettger was in his 81st year.

About fifty friends from Olds and Didsbury districts met Tuesday evening at the home of Mr. and Mrs. Seymour J. Curtis of Olds, on the occasion of their 25th wedding anniversary. A pleasant evening was spent playing games, followed by a mock wedding.
